CONGRATULATIONS  
on your sweet little baby!

*Jay and Dianne Nix*  
GOVERNOR AND FIRST LADY OF MISSOURI

Please keep this  
immunization record  
and take it with you when  
visiting Baby's doctor.  
To remove the record,  
tear gently along the  
perforations.

These immunizations are recommended by the Centers for Disease Control and Prevention's Advisory Committee on Immunization Practices, the American Academy of Pediatrics and the American Academy of Family Physicians.

*Time is of the essence.*

South Carolina  
ranks 40th  
in the nation  
with child  
immunization  
at 66.5%.\*

One out of four children in the U.S. gets his or her vaccinations late and is at risk. At Hallmark Cards, we want to be sure those kids get a better chance at good health by doing what we do best—strengthening relationships.

Since For America's Babies was established in 1995, 40 states and territories have participated in this charitable program by sending Hallmark immunization cards as part of their educational outreach efforts. These greeting cards, donated by Hallmark, help governors reach families in their states with an encouraging message to protect their children's health with timely vaccinations as recommended by the Centers for Disease Control.

Now more than ever, it is our privilege to help protect the health of our nation's children through this program.

*Under this information, you'll find three greeting card choices that can be customized for your state. Just choose the one you like best and go to <http://foramericasbabies.hallmark.com> to register or call 816-274-5220 for more information.*
