Subject: 7/6 pm Restoration Status

1st Restoration is at 65%. Anticipate its completion Saturday. After it is fully restored, cleanup will need to take place to purge inactive data and a decision will need to be made on how many years to put back into production.

Jose and Chandra's new SCOSA is being tested and is doing great. So far, March, April, May and June restores have been completed along with some data, not images, from June 18-24. January and February are running now and tomorrow employees will have access to 6 months when we switch program back on. Jose and Chandra will be in NTW to address any issues that may arise. SCMAPP will be up by morning.

Constituent Services reports an increase in calls, as does the Fair Hearings staff, about the notices that were mailed out.
