**Deanna Fulmer** I'm grateful we have all the seasons here in this lovely little state! The fall is full of sports, apples, the leaves changing and then the state fair, halloween and Thanksgiving. We work our way into winter and we have a few months of cold weather that makes me glad we have a fireplace for s'mores and to see a few fire's roaring through Christmas season and on into February. By that time, I am always ready to see the sun. This year we were blessed with a real spring of mild weather and all the new bright green leaves bursting out. Which always works its way into beach season, summer. During Summer we have the scent of honeysuckle hanging thick on the humidity followed a few months later by the smell of grapes ripe on the vine. I love, cherish and look forward to each.
