**South Carolina State Parks**

at 13:18:45 on 11/17/2020 UTC · 🌐

SC State Parks has been working for several years to create and maintain appropriate Longleaf pine habitat at Aiken State Park with the goal of establishing a new population of federally endangered Red-Cockaded Woodpeckers. Last week we successfully translocated 4 individuals (2 males and 2 females) from Francis Marion National Forest with the help of our partners at the Longleaf Alliance, SCDNR and US Forest Service. Birds were safely and successfully captured from their roost trees in the National Forest by federally permitted biologists and placed into their new homes at Aiken State Park the same night. SC State Parks is committed to the management of our new Red-Cockaded Woodpecker population at Aiken State Park, as well as existing populations at Cheraw State Park and Hampton Plantation State Historic Site. **Delores Carte** There is a pair of polished woodpeckers around our home. We worry their habitat will be destroyed with timber cutting.

at 16:04:57 on 11/17/2020 UTC

**Catherine Rigdon** John, come back so we can check it out!

**Carol Bowers** Great work guys !!!❤️

at 22:49:18 on 11/17/2020 UTC

**Margaret Anne Bumgardner DuBose** Spent an hour in the woods in Cheraw trying to find and photograph one for GooseChase but no success! Maybe at Hampton?

at 23:43:32 on 11/17/2020 UTC

**Ginger Reece** Margaret Anne Bumgardner DuBose we have seen them 2 years in a row at Hampton.

at 1:23:10 on 11/18/2020 UTC

**Lower Savannah River Alliance** Thanks for this important program!

at 18:20:23 on 11/18/2020 UTC

**Kay Arnold Timmerman** Good luck and thank you! We visit Aiken State Park occasionally and will look for the woodpeckers! ❤️

at 14:33:57 on 11/20/2020 UTC

**Tiffany Graves** Margaret Anne Bumgardner DuBose, we found a load of them at Cheraw. Believe it or not...in the trees in the parking lot. Haha.
