Subject: Try GeoMaps -- a new way to visualize our data

Dear Colleague:

Social Security provides financial benefits, tools, and information to help support you throughout life's
announce the launch of geospatial mapping at Social Security! Our new initiative, *GeoMaps,* complen
and Open Data initiatives.

For several years, we have published a wealth of data on Data.gov concerning subjects as varied as
Social Security Number Verification Service we offer for employers. We know people learn and receiv
GeoMaps is an interactive mapping tool that lets you view large amounts of our data in a quick, geogr
also download the data, and mesh it with your own data to create other maps.

We've started with these maps and plan to add more in the future:

- Old Age, Survivors, and Disability Insurance benefits by state; and
- "Help America Vote Verification System" transactions by state. Social Security manages this sys
  verifying the information of newly registered voters for federal elections.

We encourage you to explore this innovative technology by visiting our Open Government Map Galler
there are other types of maps you would like published here, you can also submit your idea to us. As
available, we'll add them to the gallery!

Please share this information with your colleagues. Thank you for your interest in our programs, and f
secure today and tomorrow!

Sincerely,

J. Jioni Palmer
Associate Commissioner for External Affairs
