## *GPS Fleet Management Helps* **Reduce Fleet Risk.**

Discover how Networkfleet can help your department or agency gain more control over fleet performance and reduce risk.

[Learn More](#)

Reducing risk in your fleet starts with monitoring vehicle performance and driver behavior. With Networkfleet, you get detailed information that can help you improve driver behavior, keep your fleet in good working condition, and protect your bottom line.

### **Improve Driver Safety**

Networkfleet provides the data you need to help reduce risky driving behavior such as hard braking and fast acceleration. Get speed alerts that notify you via email or text when a driver exceeds a defined speed limit. Plus, reports that provide data on all speed-related incidents.

### **Reduce Unexpected Breakdowns**

Poorly maintained vehicles become increasingly unsafe to drive. Get diagnostic trouble codes that warn you about specific maintenance issues at an early stage, so you can arrange to have vehicles serviced before small problems become potentially dangerous ones.

### **Verify Your Trucks Are On the Job Site**

When you know the whereabouts of your drivers, you can hold them accountable for keeping your schedules. Networkfleet allows you to monitor the location of your vehicles and track vehicle start/stop times, providing the data you need to ensure your drivers are where they're supposed to be.

[Download a short eBrief](#) on how you can use telematics to reduce risk in your department or agency.
