## Assume Control in Your Info Governance Journey

Did you know that 52 percent of information like Social Security numbers are not currently protected? By December 31, 2016, federal agencies are expected to have implemented the Capstone Initiative for best practices in information governance. Check out this infographic to learn more about how information governance will continue to impact your agency. [Download now](#)

## Managing Data Across the Government Enterprise

Governments are turning to analytics to improve efficiencies, lower costs and make better decisions but are finding that these solutions often deliver results from a single department when an integrated view would give more meaningful results. This white paper reviews the challenges of data silos and introduces a solution for breaking them down to improve your agency's performance. [Download now](#)

## What Makes Security Awareness Training Effective?

Employees are a critical part of an organization's defense against many IT security threats. Just as having the correct technology solutions is important, training personnel to recognize security threats is a critical part of any security strategy. This paper from IT analyst firm Enterprise Management Associates provides insight into what works to drive significant behavior change toward employees making smarter security decision.
