Subject: Roads Bill ~ Website email from Cindy Cason

Lt. Governor Bryant, Please do something this session about our roads. At least the House has passed a bill. DO NOT issue bonds for the roads. Roads are ongoing maintenance and need an income stream NOT a bond issue. Now a gas tax increase makes the most sense. Everyone who uses the roads participate in paying them (including people traveling through from out of state). It adds a continuing income stream for the road maintenance. I know that no one really likes a tax increase, but sometimes it is absolutely necessary. I would much rather pay a dollar or two extra when I fill up with gas than to keep paying for alignments, tires, and windshields. The gas increase may cost me \$100 more per year, but I am spending over \$300 per year on car repairs caused by our horrible, dangerous, and embarrassing roads. Thank you Cindy Cason Cindy Cason
