The Governor of South Carolina

Dear Mr. Governor

I am writing this letter to ask you to support the Bill for illegal and legal immigrants not deported. We know this bill will be soon come to a vote in the house of Congress and U.S Senate. For the past years the population of illegal and legal immigrants is getting to a normal position, they been work by their own way and its way through various business, and small business, those business have been approved by the city and the state. But those businesses are paying tax on what they doing but not on the some of the workers.

This bill will help both parties Republicans and Democrats and the country itself. I have deal with some of the illegal and legal immigrants both parties ,some of them have qualification some of them don't have, some of them are computer engineer, engineer in heavy duty machines, Software developers, university graduates and so on , the legal immigrants they use their qualification to applied for visa for holidays in United States of America ,when they get here because of the love of this country and what have seen that changes their mind .all this people are here and some people are using them without paying taxes on them, according to the system of this world ,we receive a new people every day by births in United States and around the world and this the time for united states to show the world we care , I use to drive from Chicago to Georgia , from Virginia to Georgia ,from Alabama to Georgia ,from Florida to Georgia , and I look around all the time, there is a land out there we put those illegal and legal immigrants there to plants trees to protect the nature and the rivers which need repairs ,lakes ,roads in forest areas and road repairs in the some areas , this country gives billions of dollars as an aid to some of the counties outside United States, we can create jobs like making fertilizer as a part of the aid and we ship them outside counties which receive aid from United States by putting those illegal and legal immigrants to work . What the states need to do, the state have to come out with agencies that will support and help the people by jobs and they get hire by businesses. But all bases on U.S Congress their support to every state in United States, there is a lot we can do to support illegal and legal immigrants in United States. I have a lot in mind to support, we have to bring everyone's finger print into the system of United States that will help Police to tricking all the crime some people have done in the system but they not get arrest yet, that also will FBI and other Government security agencies for their investigation to protect the people and the Country. And the people who walk through the land of Mexico to United States, United States have to build a man-made lake before the fence between Mexico and United States, from the coast of California all the way to gulf of Mexico with bridges in case of state of Emergency they can close bridges for the safety of the Country and we have state like Boston where some

part of it, the citizen have a problem with electricity when it snow ,they can use those illegal and legal immigrants by passing the cables underground , there is lot out there, they can use them, to make a change in United States, we have to hold our hands together to make that change . Mr. Governor with your support I can stand at front of United States Congress to help the illegal and legal immigrant's amnesty with support for every State to create jobs through the agencies. I have ideals which we can use to protect the rules with amnesty, like a condition, if they ask me; I use to be one of them. Thank you and may God Bless you.
