

I'm a 54 yr old woman, Over weight and struggling with some medical problems. In Sept of 2015, I was hospitalized because of blood clots in my Lungs and Right Leg. Now I'm out on disability leave. I have this disfigurement on my neck, that seems to get lots of attention. And have been judge unfairly because of this disfigurement on my neck by employers. Along with my age and my size you can see how this has been a problem for me to get hired. This has been going on since Jan 2014.

Recently I almost lost my home because of my financial situation. I had to file for bankruptcy to keep my home. Something that I thought would help me has now become a second burned. The bankruptcy has now become a second mortgage. "Please Please help me!"

Please tell me is there some type of program that would help me pay back the delinquent mortgage. I live in the State of South Carolina.

I tired a program with SC help over 5 yrs ago and was disqualified because I had to leave a part time job to take care of my dying father. South Carolina Social Service say they would charged me with negligence if he didn't have the proper care. Now I'm penalize for leaving the part time job. SC help say that I can't leave a job and ask for there help. My father died in Feb 2010. And SC help still wouldn't help me as of June 2015. When am I going to stop being penalize for that.

Please tell me is there some help for me?

Well fargo Bank is waiting on me to slip up so that they can take my house. And with the bankruptcy being as high as it is and the amount I get for disability. I'm standing on Shaky grounds.

Please tell me there is some type of program out help that can help me.

Address: 6930 South Kenwood Dr.  
North Charleston SC 29406
