Law Enforcement Workshop for Responding to UAS Intrusions

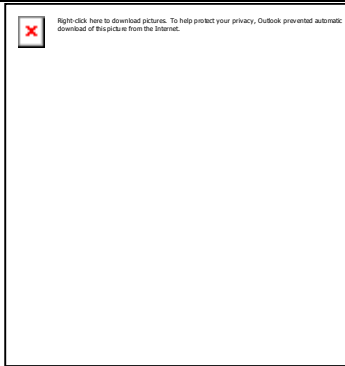

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.

Unmanned Safety Institute (USI), an ARGUS International company and industry-leading Unmanned Aircraft Systems (UAS) safety experts invite you to attend an all-new, one-day **Responding to UAS Intrusions** workshop.

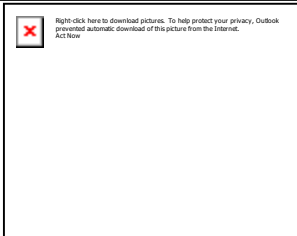

This workshop is one-of-a-kind and developed specifically for law enforcement and focused solely on responding to unauthorized unmanned aircraft operations. It offers excellent networking opportunities with local, state, and federal law enforcement officials, as well as aviation safety officials and drone experts.

Workshop participants will walk away with the ability to create a response policy for their agency on how to respond to UAS intrusions.

The agenda includes training topics covering:

- UAS equipment and components
- Critical infrastructure and sensitive locations
- Legal and regulatory issues
- Current and proposed federal regulations, including the just released FAR Part 107 regulations
- Local law enforcement responsibilities
- Drone incidents and scenarios
- How to respond to an active flyer

October 22, 2016

National Park Service (NPS), 401 W. Hillcrest Drive
Thousand Oaks, CA 91360
