Message:

It's not bad enough Obama won't stop people from infected countries entry into the country or allow commonsense quarantines, now he wants to bring infected persons to the US for treatment.

Just who does he think will be available to treat them? Will our doctors and medical personnel be forced to expose themselves and their families to infection at gun point?

This is the most ridiculous thing I have ever heard. I fully expect our so called leaders to show some backbone and stop it.
