South Carolina State Parks

at 19:24:55 on 9/22/2010 UTC · 🌐

With Atalaya coming up this weekend, let's do some Huntington Beach State Park trivia! Here you go.....What are the ferret-like creatures that can be seen at Huntington Beach on the causeway and at the jetty?

Bryn Harmer mink

at 19:29:51 on 9/22/2010 UTC

Jackie Brooks Mink.

at 19:52:28 on 9/22/2010 UTC

Susie Martin Gunter Mink?

at 19:53:15 on 9/22/2010 UTC

Christina Lee mink

at 20:03:47 on 9/22/2010 UTC

Dean M Spencer hippopotamus?

at 20:06:35 on 9/22/2010 UTC

Carson Turner Alligator snacks

at 21:44:10 on 9/22/2010 UTC

Deb Grove Whittington Northern tourists? Just kidding! We love our tourists...and mink!

at 21:47:35 on 9/22/2010 UTC

Joanne Martin We've gone there for years and years and years, and we've NEVER seen ferret-like creatures!! EVER!! *but we LOVE LOVE LOVE Huntington!

at 0:08:45 on 9/23/2010 UTC

Mary Margaret Johnson OTTERS?

South Carolina State Parks WOW! Thanks for the creative guesses! It is indeed the mink! Once extinct in the area, they were reintroduced into the Murrells Inlet salt marsh. They have traveled through the salt marsh and established populations at the jetty and on the causeway where they use the rocky crevices to hunt for prey and hide from predators.
