detailed transactions for a small sample that support the Credits to Income were analyzed by Deloitte & Touch to confirm whether they should have been taken into income. Our FMCA Reimbursement Team performed a detailed analysis for those that were taken into income to confirm the accuracy and review additional related transactions.

Since some of these overpayments involve payments received from your program, we are writing to inform you of our findings and issue a repayment.

Briefly, the following audit identifies findings for which repayment is being made:

RCG Credit to Income Analysis Methodology:

To review and analyze the RCG database for Credits to Income for the pre-acquisition period October 1, 2005 through March 31, 2006 we completed the following tasks:

- Identified all claims for which credits were taken to income for Medicaid between 10-1-05 and 3-30-06.
- Removed from these any that was less than \$50 (inasmuch as there were / are often inadvertent, rate table differences that create such "small" credits - and similar debit balances were / are also adjusted or written off).
- Identified any "underpayment" among the remaining claims for which credits were taken.
- Removed any "underpayments" found in step (3) for states which do not coordinate with Medicare (i.e. do not pay exactly the 20% that Medicare does not pay) since there could be some uncertainty regarding our "expected reimbursement" for those claims.

the FMCNA data analyst to identify credits and supporting documentation.

Audit Methodology

To review and analyze the FCG database for Credits to Income for the pre-acquisition period October 1, 2005 through March 31, 2006 we completed the following tasks:

- 1) Identified all claims for which credits were taken to income for Medicaid between 10-1-05 and 3-30-06.*
- 2) Removed from these any that was less than \$50 (inasmuch as there were / are often inadvertent, rate table differences that create such "small" credits - and similar debit balances were / are also adjusted or written off).*
- 3) Identified any "underpayment" among the remaining claims for which credits were taken.*
- 4) Removed any "underpayments" found in step (3) for states which do not coordinate with Medicare (i.e. do not pay exactly the 20% that Medicare does not pay) since there could be some uncertainty regarding our "expected reimbursement" for those claims.*
- 5) Identified and removed any subsequent "reversals" of the credits taken, "refunds" and/or "recoupment" by the plans in question (as these would directly offset the credits in question)*
