SC Club for Growth Scoring Alert - Department of Administration

The South Carolina Club for Growth urges all Senators to vote "YES" on any amendment that would move procurement to the Department of Administration and "NO" on any amendment that would move it to the State Fiscal Accountability Authority.

If procurement is placed under the State Fiscal Accountability Authority this will leave a vital function of government under an unaccountable board.

Any talk of the success the Budget and Control Board has had running procurement is simply untrue. In 2007, a \$20 million no bid contract with ties to a former legislator was uncovered. This contract cost taxpayers millions of dollars and not one person was held accountable. Just changing a name does not fix the problem.

Reforming the unaccountable Budget and Control Board has been a focus of the South Carolina Club for Growth since our founding, and will be a large part of the SC Club for Growth's 2013 scorecard.
