Subject: gas Tax ~ Website email from Carolyn Dalton

I am extremely disappointed in the opposition to a gas tax by South Carolinians. Most families own two vehicles, while they may be on food stamps, have money for tattoos, cigarettes and an expensive telephone and rent a place to live. My point is the gas tax is the most equitable tax there is. I am well into my senior years and on a fixed income but I want roads and bridges safe for my family and no increase in 30+ years is ludicrous. Reelection seems to be uppermost on the elected officials, not the image that South Carolina presents to our visitors who have to ride our roads, while looking at the litter strewn roads. When South Carolina has to defend its negligence in court by lawsuits over deaths and terrible medical expense due to injury caused by road hazards, MAYBE something will change. Embarrassing roads to say the least. Think about your neighbors.
