**Subject:** Want to learn more about LEED v4? 1/26 In Columbia

USGBC South Carolina News & Events

## **COLUMBIA, SC EVENT CEU EVENT - JANUARY 24th**

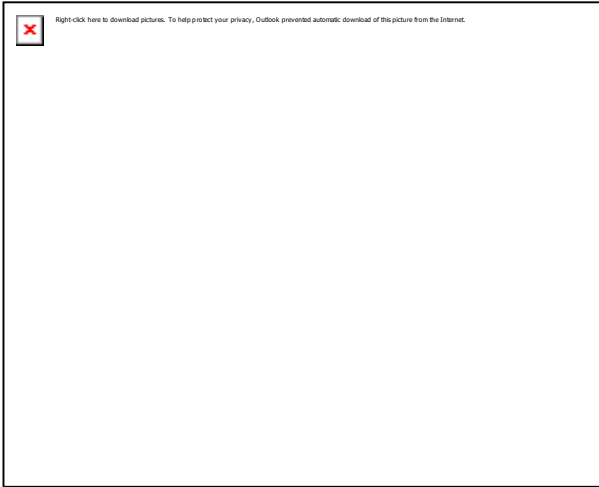

In this one-hour presentation you will learn about the changes that come with the latest release of the LEED rating system. As with each iteration of the checklist, version 4 raises the bar in many categories. In addition to increased requirements, this version also introduces a new category, “Location and Transportation.”

The course will start with a quick comparison of LEED V3 to V4, highlighting the credits we already know and understand. This will progress into the credits that have the same premise but have

increased the requirements directly or through referenced documents. Information will be provided on all of the new credits and prerequisites to give a general understanding of the intent and requirements for each.
