Subject: EMD Alert - Darlington Building Fire

See below from EMD this morning.

Just FYI- this is a big event for Darlington County. We still do not know if this was intentional or not, but the building is in very poor condition at this time. The driver was pronounced deceased on scene. No additional state assistance has been requested at this time.

At 05:34, Mike McDonald, County Director called and reported that a vehicle struck the main courthouse in that county and was on fire. He did not give me an address yet. They do have fire on scene and they have requested SLED to come out to investigate in case if it was accidental or intentional. They have been no reports of injuries or fatalities. He also reported that the structural integrity may be bad at this time. He did want the REM's and the EMD/DO be contacted immediately.
