Look Up! Perseid Meteor Shower Peaks Aug. 11-12

"Forecasters are predicting a Perseid outburst this year with double normal rates on the night of Aug. 11-12," said Bill Cooke with NASA's Meteoroid Environments Office in Huntsville, Alabama. "Under perfect conditions, rates could soar to 200 meteors per hour."

Sharen McRae Bramlette Look up tonight Emily Lauren Bramlette and Anna Elise Bramlette !

at 1:01:18 on 8/12/2016 UTC

Joette Gdovin Hope we can see them!

at 1:24:02 on 8/12/2016 UTC

Terry Conway Saw a dozen from 5:30-6am. Missed the peak time from midnight-2am. But still cool. Will watch tonight for the "leftovers" that always hang around.

at 14:14:58 on 8/12/2016 UTC

Mac Miller Trust me when I tell you 12-2 was not peak. We unfortunately were in the ER til 12, with the hopeful bonus of sharing shooting stars with my 4yo on the way home. Nothing. Out in the driveway (in the country) for another 20 min. Nothing. Not one. Bummer! Maybe we can catch it next time! :-)
