**To: Governor Nikki Haley
From: Mike Roth (NC citizen)**

If your emergency team has not considered this idea, I would like you to consider the potential for quick bridge construction from US military resources. During WW11 there were "Bailey Bridges" quickly deployed on D Day.

Our military and Seabees can and do construct portable bridges in war zones and can quickly offer the same expertise to your state.

The US army has the M60A1 Armored Vehicle Landing Bridge. This Vehicle could deploy many dozens of bridges throughout the state until new ones are constructed.

The SEABEES also have many rapid deployment methods that could help your citizens deal with this hardship. I wish you all well.

**Mike Roth
