TIDBIT! Brown pelicans are one of two pelican species that dive into the water to capture prey. They dive from an amazing height of 20 to 30 feet! After catching the prey (and as much as 3 gallons of water), they tip their bill downward to drain the water before swallowing the fish whole.....now you know! Come to Charles Towne Landing and check out our resident brown pelicans. www.southcarolinaparks.com/ctl

Brenda Boyd Hill Have seen many at Pelican Point on Harbor Island ,SC.

Mike Griffin All over Murrells Inlet, awesome to watch them fish.

at 21:40:21 on 2/04/2014 UTC

Jonnie Britton ...and besides that.....they are sorta cute!
