GUN RESTRICTIONS:

Gov. Haley,

As for legalizing guns, there are some professions that need them on the job. Then, some people like to have one put away in their houses for protection in hopes that they never have to use them. Also, some people who go deer hunting need them at times.

Some people who are too impatient, quick-tempered, or just don't care shouldn't have guns where they are easy to grab and shoot. I've heard of small children who shot guns accidentally that were nearby at the time. In vehicles, they should be only in the trunk.

Recently, I heard that it was being discussed at a college in Florida if to allow college student (mainly females) to carry guns on campus. But, it would be ridiculous because they could be used regardless of why.

Therefore, guns should be restricted instead of legalized so easily.

Sincerely,

Twylah M. Ricker
