

DEAR GOVERNOR :

we wrote to you a few years ago in hope of getting help from your office pertaining to this on going harrasment problem that we are still forced to tolerate which is now not possible -

someone (or persons) at opportune times (right now its at night mostly) are keeping these strange buzzing, whistling and various other electronic sounds directed thru our home and thru out our property. This stuff keeps us in headakes, earakes, and more/ we can't get any sleep because of it, thus damaging our abilities such as operating vechicles, running machinery and more. IT makes our dogs howl and roll there ears on the ground and act short tempered. It is now effecting our memories and constraction, along with our Judgements -

The sheriff's boys, The energy dept have been out here time and time again. They reconized the problem of course but the source is another issue.

we need your office to please help shut this down and jail everwhats behind it. whatever it is. Its for bad people to use in evil ways. maybe its an expermint for future deeds. we need your help. Not The countys. we will meet for discusion if Asked. send confirmation upon arrival of this document.

Mr. Mays James
